PROFESSIONAL SUMMARY

I am a skilled Software Developer with over 4.5 years of experience in building efficient and user-friendly web applications using React.js, PHP, and modern front-end technologies. I specialize in improving performance, enhancing user experience, and collaborating with teams to deliver high-quality projects. With strong problem-solving skills, attention to detail, and a focus on delivering valuable solutions, I am committed to creating seamless and engaging digital experiences.

TECHNICAL SKILLS

React JS • TypeScript • JavaScript • PHP • FastAPI (Python) • HTML5/CSS • Tailwind CSS • MUI • Zustand / Jotai • MySQL • Firebase • Git/GitHub • Docker • AI Integration (LLM APIs) • OpenAI-compatible APIs

PROFESSIONAL EXPERIENCE

Scalability Engineers – Dehradun, India

Scalability Engineers is India's leading technology services organization helping fortune companies globally in managing their database infrastructure. Scalability Engineers works on some of the world's most complex data-driven solutions, supporting highly sensitive and demanding data ecosystems and SLAs, including for one of the top five fortune clients.

Software Developer

June 2021 – Present

- Delivered full-cycle development of dynamic websites, integrating front-end frameworks like React.js and backend technologies such as PHP.
- Built the complete front-end UI for MedyxHealth, a healthcare innovation and digital transformation platform, translating requirements into responsive, accessible React components.
- Took ownership of the front-end codebase for Hobu, a data-powered property research platform (React 19 + TypeScript, Vite, Zustand), shipping new features including real-time streaming AI chat, guest search with login-gated upgrade, and Typesense-powered search after taking over from the original developer.
- Developed mobile-first designs ensuring optimal user experience across various devices, leveraging Tailwind CSS and Bootstrap.
- Designed and optimized relational database schemas for efficient data handling, enabling seamless performance for high-traffic applications.
- Created and consumed REST APIs for platforms like Samanvay Samiti, enhancing communication between front-end and backend systems.
- Implemented advanced search functionalities, improving usability for platforms such as Samanvay Samiti and Kohive.
- Boosted organic reach and visibility for Kohive and Paradise Chopta by conducting comprehensive SEO audits and implementing best practices.
- Reduced application load times by 15% for Four Corners through optimization of REST API calls and React components.
- Improved user engagement for Paradise Chopta by designing intuitive navigation and incorporating inquiry and booking features.
- Created reusable React components for consistent UI/UX across projects like Kohive and Four Corners.
- Partnered with clients to gather project requirements, ensuring timely delivery of tailored solutions that aligned with their goals.

PROJECTS

Hobu | AI-Powered Property Research Platform | [Click Here](#)

React 19 • TypeScript • Vite (SWC) • React Router 7 • Zustand • Firebase Auth • Typesense • Nivo

- Owned and extended the front-end of Hobu, a data-powered platform giving homebuyers 50+ insights across pricing trends, schools, amenities, and neighborhoods, including the marketing site, auth flows, and product pages.

- Built a real-time streaming AI chat experience (SSE/A2A) with markdown rendering, error boundaries, and performance-aware analytics (Microsoft Clarity), integrating an A2A-based chat client with a gateway REST API for conversational search and configuration.
- Implemented client-side search with Typesense and Firebase Authentication (Google OAuth, email/password, and guest sign-in), including a guest-to-account upgrade flow so non-logged-in users can search and chat before signing up.
- Added Nivo-powered data visualizations (bar/line/pie/radial charts) for neighborhood insights such as schools, education, and local market context.
- Set up CI/CD with multi-stage Docker builds deployed via GitHub Actions to GHCR.

MedyxHealth | Healthcare Web App | [Click Here](#)

- Built the entire front-end UI for MedyxHealth, a healthcare web app covering staff login, patient management, scheduling, ECG upload, medical history, and demographics, consuming a remote backend hosted on Google App Engine.
- Built with React 18 + TypeScript, Vite, React Router 7, and Recoil (with recoil-persist) for state management; styled with Tailwind CSS, MUI, Emotion, and Headless UI.
- Implemented SMS/email OTP authentication with JWT-style Bearer tokens in cookies, route guards, and role/permission-based access control.
- Added PDF generation and export (jsPDF + html2canvas), Nivo charts, Framer Motion animations, and form UX with react-select, react-datepicker, and toast notifications.
- Set up testing with Jest and Testing Library; deployed via Google Cloud App Engine and Cloud Run using Dockerized nginx builds.

Elevora | AI-Powered Professional Networking Platform | [Click Here](#)

- Built Elevora end-to-end as a personal project — full front-end and back-end — with the help of Cursor IDE.
- Front-end: React 19 + TypeScript, Vite, Tailwind CSS 4, Jotai for state management, and Vitest for testing.
- Back-end: FastAPI (Python) with SQLAlchemy 2 and Alembic migrations, WebSockets for real-time messaging, presence, notifications, and call signaling.
- Implemented JWT-based authentication (access/refresh tokens) with bcrypt password hashing, and integrated an OpenAI-compatible LLM via NVIDIA NIM for AI features.
- Added WebRTC-based real-time audio/video calling with STUN/TURN support, and used MySQL locally with TiDB Cloud for production.
- Deployed the front-end on Vercel with SPA routing and CORS configuration for cross-origin access.

Four Corners

- Enhanced the application using React and TypeScript, adding new features.
- Optimized REST API calls to reduce load time by 15%, improving page speed.
- Debugged and resolved application issues for a better user experience.

Samanvay Samiti | Matrimony Platform

- Developed a matrimony platform with React.js and Node.js, featuring an intuitive interface and advanced search capabilities.
- Implemented REST APIs and optimized calls for performance improvements.
- Worked closely with clients to gather requirements and deliver tailored solutions.

Paradise Chopta | Adventure Camp

- Created a dynamic website for Paradise Chopta, a premier adventure camp in Chopta, Uttarakhand.
- Highlighted adventure activities, accommodation options, and packages.
- Designed a responsive site with integrated booking and inquiry features, emphasizing seamless navigation for an enhanced user experience.

EDUCATION

B.Tech in Computer Science

Uttaranchal University, Dehradun, Uttarakhand | July 2021

Intermediate

S.G.S.V.M Inter College, Dehradun, Uttarakhand | June 2016
